

Update and List of Improvements from the Museum.

- electric sign out front

- removal of the carpet from the walls and replace with drywall and paint the main floor

- replace the kitchenette upstairs with a new unit

- changing of the light fixtures through the building

Restoration of the exterior wood doors and repair of the open gaps in the doors.

We want to replace the carpet flooring on the main floor as you are aware, we need testing for asbestos but we are obtaining a quote from a local contractor so we can do that one on our own after the testing is complete.

Laurel has been working on the strategic plan and will submit the entire thing to council when it is completed.

Laurel is applying for a Trillium Grant to support the above initiatives.

Lease is expired and the museum has submitted a letter of intent for an extension of 5 years. See attached.
